'Learning Korean is easy.' I'm sure most of you have heard that from others. However, many of you may be confused and hesitant about *where and how to start*.

Learning Korean is like riding a bicycle; my philosophy is to *keep practicing*. My courses are the best example to reflect this philosophy.

"Can I really do it? But I am a complete beginner compared to other beginners.."
Is learning vocabulary the most important thing for a complete beginner? I think differently.

When learning Korean, the most critical phase is the beginning, akin to learning the ABCs in English. In Korean, which differs significantly from Romanized languages, the creation of sounds and methods of pronunciation are entirely unique.

The pronunciation of a beginner in a foreign language **doesn't undergo significant changes**, even as they progress to an advanced level.

Therefore, when learning Hangul, the presence of a teacher capable of offering **precise pronunciation** becomes crucial.

With over 10 years of teaching experience and more than 10,000 hours invested, I am here to guide you through your Korean learning journey and provide you with the finest Korean pronunciation skills.

With my course, **mastering the Korean alphabet in just one hour** is within reach for anyone.

Everybody, let's make our dreams come true!

Korean Mario

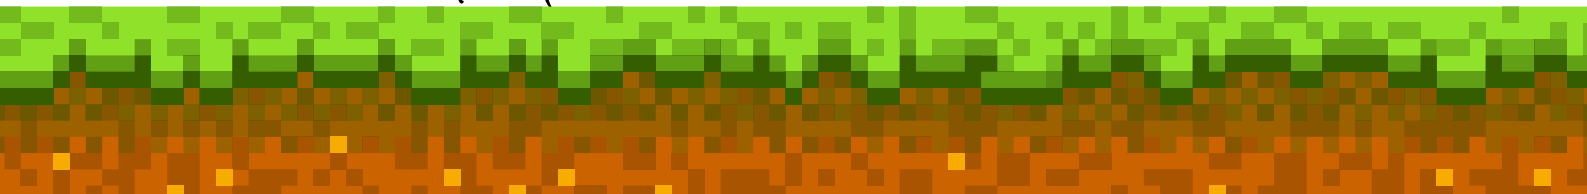

TABLE OF CONTENT

	Introduction	4
	Chapter 1: 모음 Korean Vowels	5
	-Read and write single vowels	6
	-Practice writing	9
	-Read and write compound vowels	10
